

## Bank on Students Emergency Loan Refinancing Act – Fact Sheet

**Student loan debt is exploding, creating a crisis that threatens our economy.** Outstanding student loans now total more than \$1.2 trillion, surpassing total credit card debt – and every year, students are taking on more.<sup>i</sup> An astonishing 71% of college seniors had debt in 2012, with an average outstanding balance of \$29,400 for those who borrowed to get a bachelor's degree.<sup>ii</sup>

**Federal watchdog agencies are sounding the alarm – student debt is crushing the middle class.** Key federal economic agencies like the Federal Reserve, the Treasury Department, and the Consumer Financial Protection Bureau have weighed in on the dangers of exploding student debt. This debt is stopping a growing proportion of families from buying homes, saving for retirement, and making purchases that will keep our economy on the road to recovery.<sup>iii</sup>

**Young borrowers are failing to keep up with payments.** One in seven borrowers defaults on federal student loans within three years of beginning repayment.<sup>iv</sup> Other borrowers are just barely keeping their heads above water – in total, 30% of Federal Direct student loan dollars are in default, forbearance, or deferment.<sup>v</sup>

**With borrowers struggling, the federal government is reaping profits from old student loans.** Old loans are locked into high interest rates by Congress, and a recent GAO report concluded that according to official estimates, the federal government is projected to make \$66 billion on student loans issued during 2007-2012.<sup>vi</sup>

**Last year, large bipartisan majorities agreed that federal loan rates were far too high and voted to lower them this year for new borrowers – but did nothing for existing borrowers.** House Speaker John Boehner (R-OH) hailed last year's agreement as a "market-based solution" that was "consistent" with Republican policy proposals.<sup>vii</sup> Senator Burr (R-NC) said the new rate legislation "ensures access and affordability for students."<sup>viii</sup>

**With interest rates near historic lows, homeowners, businesses, and even local governments with good credit regularly refinance their debts – but students have few options.** Even though the federal government is by far the biggest student lender, it offers no refinancing option. Private refinancing options are extremely limited, and federal borrowers cannot participate without sacrificing key consumer protections on federal student loans.

**With at least 40 million Americans squeezed by this debt, refinancing high interest loans to this year's rates will reduce federal profits and give a much-needed break to young people struggling to build a future.** The savings could amount to hundreds or thousands of dollars a year, depending on the circumstances of the particular borrower.<sup>ix</sup>

**This legislation would give student loan borrowers a fair shot at managing their debt by offering them the opportunity to refinance their debt at the same low rates offered to new borrowers in the student loan program:**

- **Allows eligible student loan borrowers to refinance their federal loans.** All eligible federal FFELP and Direct student loan borrowers could refinance their high-interest loans down to the rates offered to new federal borrowers in the 2013-2014 school year under the Bipartisan Student Loan Certainty Act.
- **Allows eligible student loan borrowers to refinance their private loans into the federal program.** The bill provides those who are in good standing the option of refinancing their high-interest private student loans down to the rates offered to new federal student loan borrowers this year. Those who refinance will also have access to the benefits and protections of the federal student loan program. Participation is fully voluntary.
- **Eliminates tax loopholes for millionaires and billionaires.** The Act covers the full budgetary cost of refinancing by implementing the Buffett rule, which ensures that millionaires and billionaires pay their fair share in taxes.
